124 Hai Phong St, Thach Thang Ward, Hai Chau District, Da Nang City, Viet Nam

December 08, 2023

**To: Professor. UEMOTO Shinji,
President
Shiga University of Medical Science**

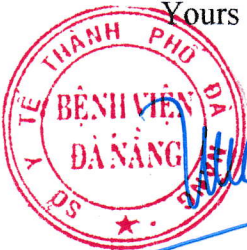

Dear Professor. UEMOTO Shinji,

On behalf of Da Nang hospital, I would like to send all colleagues of Shiga University of Medical Science the best greetings and prosperity wishes.

With respect, I have heard of your university's 50th anniversary next year. This would be a remarkable occasion to show the world of your significant contribution to the medical profession through your outstanding developmental history. Over the years, your institution has strived to cultivate excellent medical professionals, conduct outstanding medical research, and practice high-quality holistic medicine as a university supported by the local community. We are proud to be one of your many international partners with joint activities including experts exchange, medical education as well as joint researches of mutual interests. Personally, Dr Tra Tan Hoanh and I visited your university in 2019 upon the invitation of Dr Kohei Shiota to discuss about Stem Cell transplant in partnership with Dr Suzuki from Kitano Hospital. It was a wonderful time to have your hospitality and discuss cooperation opportunities between our organizations.

I would like to take this opportunity to congratulate you on your successes and hope that you will further develop the medical industry through training important medical professionals for the health sector, contributing to the overall medical knowledge development of the world. I also hope that our partnership will be long lasting and develop to a new level of mutual cooperation in the near future. This relationship is not only beneficial for the individual organization but also for our partnership between Viet Nam and Japan in general.

Yours Sincerely./.

Le Duc Nhan, M.D., Ph.D.

Director of Danang hospital
